DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Applicant's invention has been found to be novel over prior art of record because prior art fails to show a primary and secondary conductive cable members used for active sensing, i.e. propagating an injected signal and receiving a reflected signal and measuring the impedance change, and passive sensing, i.e. generating a signal in response to a terminal voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wagner et al. (US 4598168) disclose a strain sensitive cable. Harman et al. (US 5473336) disclose a cable for use as a distributed antenna. Rich et al. (US 20040114888) disclose a multi-function security cable with optic-fiber sensor.
